Method to delete/remove/uninstall a certificate

Launch Keychain Access via spotlight:

Spotlight	keychain
	Show All in Finder
Top Hit	👫 Keychain Access
Applications	🖗 Keychain Access
Look Up	💆 keychain
Web Searches	 Search Web for "keychain" Search Wikipedia for "keychain"
	Spotlight Preferences

Ensure both **login** for keystore/keychain and **Cetificates** is is selected to navigate to the PFX certificate to remove/uninstall. Select the certificate titled with the appropriate username:

00	K	eychain Access						
Click to lock the le	ogin keychain.		٩	Q				
Keychains login Micrertificates System System Roots	Certificate j2204 Issued by: MFCIssuer3Sierra.banner.multifactortrust3.com Expires: Saturday, June 9, 2012 12:15:05 PM Pacific Daylight Time Image: Control of the second

Two finger click and hold (which facilitates a right mouse click feature in the WIndows environment) to receive the drop down menu of options of the selected certificate and select **Delete "Certificate Name":**

New Identity Preference
Copy "j2204" Delete "i2204"
Export "j2204"
Get Info Evaluate "j2204"

Confirm proceeding with the popup prompt that you want to indeed delete/uninstall the desired/selected certificate by selecting **Delete**:

	Click to lock the l	ogin key	Keychain Access							Q.		
Keychains login Micrertificat System System Roots	Keychains Iogin Micrertificates System System Roots	Name			Are you sure you want to delete "j2204" from the login keychain? Warning! If a private key is deleted, certificates associated with that key can no longer be used. This may prevent you from reading encrypted messages or making secure connections. Proceed only if you are certain that you no longer need the selected key. Cancel Delete					Keychain 1 AM login PM login	Keychain Iogin Iogin
